CUSTOM COLOURS**

**LOW
MAINTENANCE**

**FIRE
RETARDANT**

AFFORDABLE

The Many Uses Of SurGuard®

A Protective coating for exterior or interior masonry walls of residential, commercial or industrial buildings. It is ideal as a high-performance protective topcoat for prefabricated and precast concrete walls and stucco.

Effective for coating brick walls, home foundations, concrete beams, columns, aluminium or galvanized siding, ceilings, balconies, retaining walls, etc. Suitable for recoating old, previously painted surfaces. Helpful in improving the acoustic properties of interior walls and ceilings.

FEATURES:

Weatherproof & Protective:

SurGuard® utilizes the most stable, inorganic components and pigments to ensure total weatherability and permanency of colour. It repels rain, sleet and snow and virtually eliminates vulnerability to the elements.

Fire Retardant:

SurGuard® will not combust. It is completely fire retardant.

High Breathability:

Is a key property that eliminates vapour pressure build-up behind the coating. Water vapour passes freely, thus eliminating the possibility of blistering, peeling or spalling.

V.O.C. Compliant

SurGuard® exceeds all North American standards for V.O.C. content. It is water-based and environmentally friendly, with less than 2% volatile organic compound per 3.785 Litres.

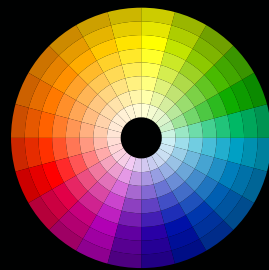

Durable and Flexible:

SurGuard® is virtually indestructible. It will not dent, corrode, peel, chip or delaminate. It is unaffected by alkali.

Because it is a water emulsion and chemically inert, there can be no acid-alkali reaction, and because of this, there is no subsequent delamination of the coating. It offers excellent resistance to sudden and wide temperature fluctuations.

Low Maintenance:

SurGuard® is virtually indestructible yet flexible with excellent impact resistance. SurGuard® is no mere paint film. It is unaffected by water, salt, acids, alkalis and the corrosive elements in smoke and smog. This coating will last a very long time, saving you money on maintenance.

SurGuard®

It comes in unlimited custom colours and is affordable.
